ANSON'S CONTRACTS

ELEVENTH EDITION

This Edition of Sir William Anson's well known treatise is from the Eleventh English Edition just issued at Oxford, and constitutes the Second American Edition prepared by Dean Huffcutt, of the Cornell University College of Law. The book contains therefore the latest English and American treatment of the principles of the law of contract.

The American Editor has in this edition followed the usual form of **American law books by dividing the text into numbered sections with black letter headings.** The portions of the English text dealing with modern English statutes have been printed in smaller type. The American notes have been very considerably expanded, and in several instances have been carried into the text in order to afford an opportunity for fuller treatment, as, for example, in the case of the notes upon "Promises for the Benefit of Third Parties," "Joint Promises," "Substantial Preformance," "Performance to the Satisfaction of the Other Party," etc. While an effort has been made to keep the book within reasonable compass, the number of cases cited is greatly increased and the cases have been carefully selected as leading or instructive upon the points to which they are cited. Statutory references have also been greatly increased as in the case of statutory modifications of the doctrines of sealed instruments and of the contractual capacity of married women.

The book is already widely used in England and America as the very best presentation of the elementary principles of contract. This edition with the latest corrections and additions by the author and the American editor cannot but increase its usefulness to both student and practitioner.
